DECLARATION OF COMPLIANCE TO REACH REGULATION 1907/2006 AND CANDIDATE LIST (SVHC) UPDATED TO 16 JANUARY 2020

Following the publication and updating of the Candidate List in addition to Reach Regulation 1907/2006 involving the obligation of registration, evaluation and restriction of the use of highly dangerous chemicals, we declare the as follows:

- Mca does not manufacture or import chemicals (in quantities equal to or greater than one ton/year)
- Mca does not produce articles that intentionally release chemicals
- Chemical substances (preparations) purchased by MCA (in quantities below 1 ton and not directly imported) are used only for production-related operations and the burden of their registration falls on suppliers, either directly or through their respective suppliers
- Mca, as a chemicals downstream user is not obliged to registration, but only to the application of the current regulations on the prevention of risks deriving from the use of this type of substances, on the classification and disposal of special waste and on the protection of the environment and the health of workers

From the date of application, Mca has been complied with the obligations of the Reach regulation in the expected times and ways:

- by requesting its suppliers wrote certification that the materials used for all the products supplied to its Customers do not contain the substances subject to the registration obligation or the very high concern substances that appear on the list of candidate substances in concentration higher than 0.1% w / w
- by requesting the updating of the safety data sheets (SDS) related to each chemical product, to identify and put into practice appropriate measures for the assessment and control of risks.

It should be noted that the information held by Mca does not derive from tests carried out on the products, but they are based on suppliers' certifications.
